To whom it may concern,

Over my college experience, there have been many skills and qualities that I obtained. Not only did I learn skills but I also learned to be strong and handle a full course load. My freshman year in college, I lost my mother two weeks before finals. This to many people would have caused them to either drop out or ask for extra time to handle finals; but that was not the case for me. Instead, I focused on my original and set goal to finish school in 2017 just as me and my mother had planned. No matter what obstacles come my way, I continue to complete my tasks and focus on my goals. There has never been a time where I have given up nor a time where I have dissappointed a boss nor a client.

As for skills, I possess the ability to work with Adobe products such as Indesign, Illustrator and Photoshop. I am well equipped with other programs such as Microsoft products. I have impeccable communication skills and I am easy to get along with. I have also designed and coded my own personal website. I am well equipped with working with cameras, video boards, live stream videos, marketing tactics, social media, advertising, writing and broadcasting. If I have to choose what is my favorite aspect of Mass Communications or Marketing, I cannot choose because I love to be able to utilize all these skills in order to put forth my best efforts.

Though I possess many skills, there are still a lot of things I need to learn and I am willing to put forth any hard work and attention I need to in order to become the best possible candidate for an intern. There is so much for me to learn as a college graduate and I hope to be given the opportunity to show you my hard work, passion and dedication I have for mass communications and marketing.

Thank you for your time and Consideration!
